

1. The reason our group chose this topic:

We chose the topic “Water Shortage in Butuan City” because it has been a real and urgent situation that plagued a lot of people within our community. Water, being the most needed substance in daily life, and the problems caused by shortage, such as difficulty in getting clean water, health risks, and disruption of school and home activities, are things that we see and experience personally.

We also want to create awareness and make others understand the causes, effects, and possible solutions to this crisis so that the community can understand the situation in detail and find a way of improving it.

This topic is relevant, meaningful, and important to Butuan City today.

2.The individual contributions of each group member:

Member 1: Jharlle Rhynz C. Reyes

- Researched the Introduction and background of the water shortage
- Helped write the Causes section
- Assisted in editing and proofreading the website content

Member 2: Jerich Miguel Q. Cagang

- Created and designed the website layout and styling
- Organized the navigation, sections, and animations
- Compiled the References and inserted external links

Member 3: Yuan Kirth C. Rosillo

- Researched the Effects and Solutions
- Helped organize information into lists
- Assisted with final checking and improving the presentation flow

3. Screenshots/photos while doing the project:
